

smart power station

FOR PRECISION VOLTAGE

MODEL PS 10

- **FREE CONNECTED EQUIPMENT WARRANTY UP TO \$500,000**
- **FREE 6-YEAR REPLACEMENT WARRANTY**
- **8 OUTLET SMART BOARD INCLUDED**

DOUBLE FILTRATION AND DOUBLE PROTECTION COMBINATION EQUALS TOTAL POWER MANAGEMENT

POWER MANAGEMENT

On top of the pristine power produced by the Smart Station we have included our state-of-the-art, 8 outlet, Smart Board (pat pending). When attached to the Smart Power Station it delivers DOUBLE the protection and DOUBLE the filtration, incorporating our Dynamic Active Tracking Technology. In addition to this there are 3 isolated banks on the Smart Board ensuring there is no "cross talk" or interference between components connected after the Smart Station. This configuration can be argued as being the best combination available for providing pure and precise 240 volts to your valuable electrical equipment. Equipment that was designed to run on 240 volt power ensuring you get maximum performance and enjoyment for many years. When it comes to minimising risk, we make no wild or glossy promises. Our products do what they say they do — it is that simple!

smart power station

FOR PRECISION VOLTAGE

MODEL PS 10

FEATURES

- The Power Station does not regenerate the sine wave. This means the THD (total harmonic distortion) that the power station delivers is exactly what the power utility supplies. To ensure your audio output isn't compromised.
- The Power Station's default output voltage setting is 240V. On the rear of the unit this setting can be changed to a 220V Output (select the switch from 240V to 220V). Our experience has found that devices that are designed to operate on a 220V Power Supply will perform better when the voltage they were designed to operate on is supplied.
- The Power Station output voltage display will only change when there is a 3% or more variance to the incoming voltage. This is a factory setting and normal.

- **PURE UNPOLLUTED 240V/220V SINEWAVE POWER 24/7**
- **WHISPER QUIET SERVO MOTOR FOR VOLTAGE CALIBRATION**
- **DELAY START SECONDARY PROTECTION STRATEGY**
- **MICROPROCESSOR CONTROLS**
- **DUAL LED DISPLAY INDICATING INCOMING POWER AND OUTPUT POWER**
- **MIDDLE DISPLAY SHOWS CURRENT LOAD OF CONNECTED COMPONENTS**
- **10 OTHER LED ALERTS SHOWING VARIOUS POWER CHANGES INSTANTLY**
- **FRONTLINE FILTERING AND SURGE PROTECTION THROUGH POWER STATION**
- **DOUBLE FILTER TRAP AND DOUBLE VOLTAGE PROTECTION THROUGH CUSTOM 8 WAY SMART BOARD**

Incorporating Dynamic Active Tracking filtering technology

3-in-1 isolation

8 Outlets

Data & Aerial protection

Cable TV adaptor

Fibre Optic & Broadband compatible

220/240V User selectable option

Display dimmer settings

PS10 actual unit measurements (not including A12):
436mm (wide) x 380mm (deep)* x 195mm (high)

*includes rack earth connection on rear
